Designer

Starting Inspirations

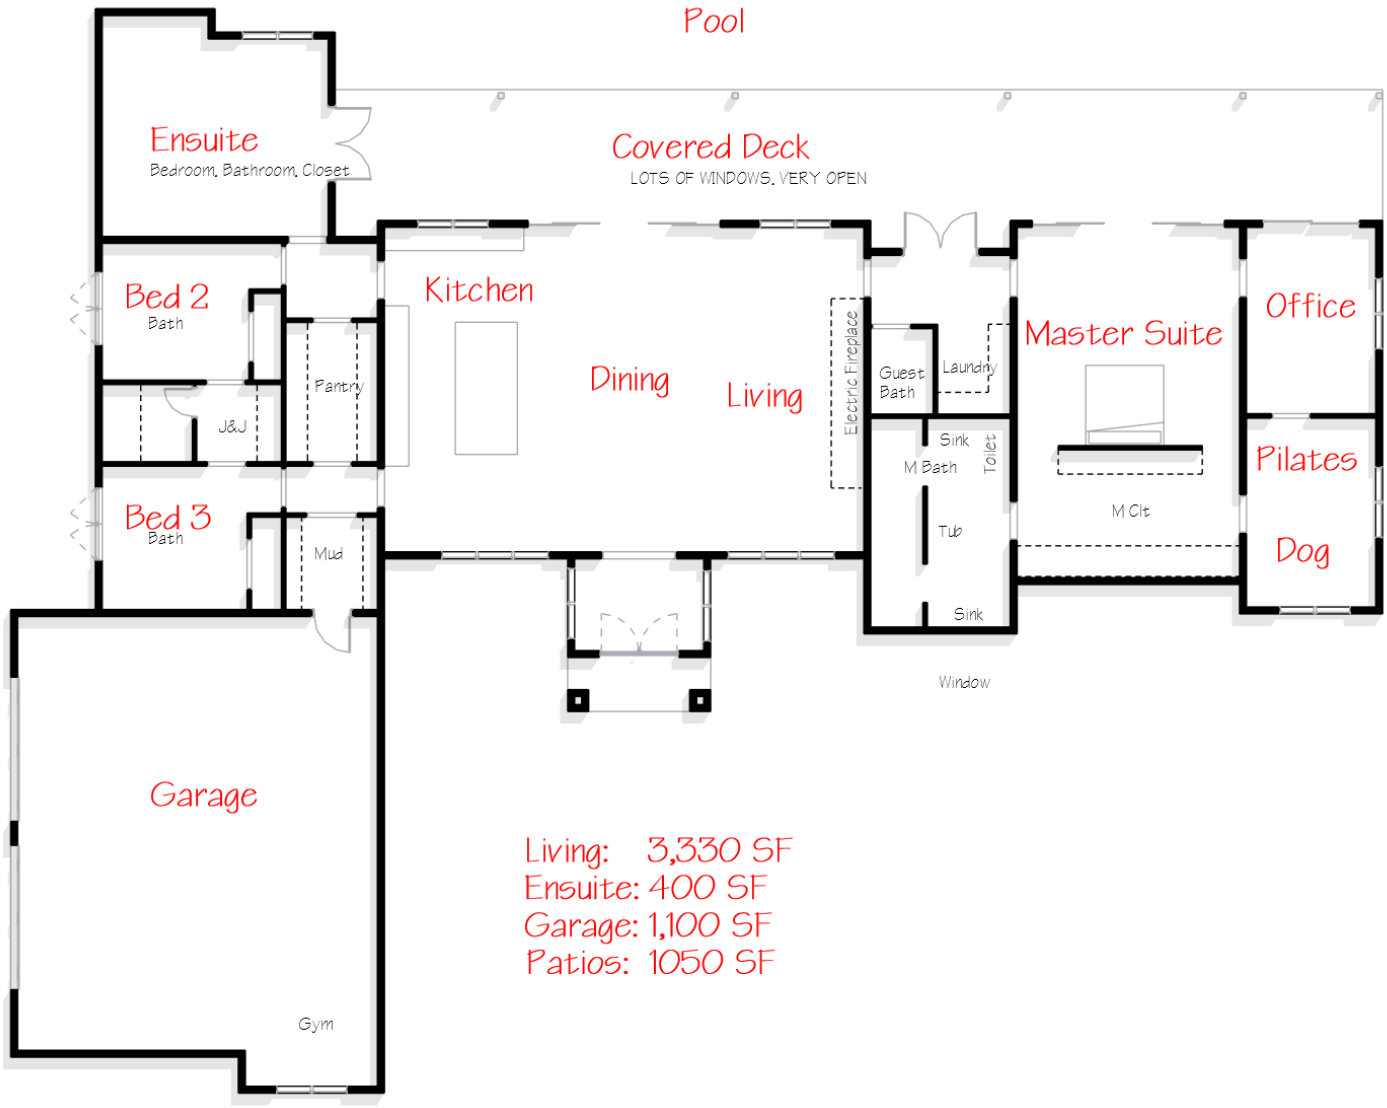

….. And Lots More, I have them all saved to your file

Conceptual Layout

Living: 3,330 SF
Ensuite: 400 SF
Garage: 1,100 SF
Patios: 1050 SF

Conceptual Shape (Model)

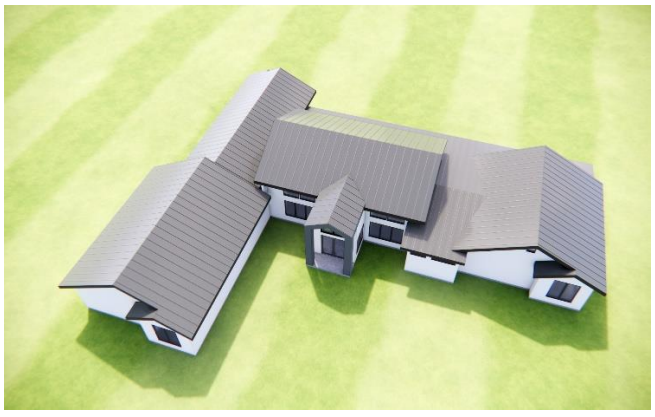

Conceptual Textures

Ideas

- Adding in more windows where needed, especially on the living area and bedrooms.
- We can experiment with different exterior finishes to the walls, soffits & accents to get the color scheme you prefer. I think we can add a few more earth tones, and we do need to decide on a general theme.
- I used gable rooflines for this concept, but we can look at single slope / more modern looks on our next meeting. It is pretty easy to change the rooflines.
- I couldn't quite figure out the guest bathroom where you had it, but I think it fits nicely adjacent to the laundry area. We will work together on the floor plan at the start of design until we have it perfect.
- We will load in the topography & lot lines prior to our next meeting – I think we ensure the house is within necessary bounds & oriented correctly from the beginning, since we are pretty wide overall.
